

Fifth Amendment to Declaration of Covenants, Covenants, Conditions, and Restriction on 6th day of May, 2000.

Add to existing Article 4, Section 1 (1) Antennas

Satellite dish receivers 18" or smaller will be allowed, provided they are installed on house or properties such they are no closer to the road than the front (street side) of the house. Every reasonable effort should be made to minimize the visibility of the dish from the street. The board of directors must approve the location and verify the size of the satellite dish before installation. The board may require the location of the satellite dish to be moved to a less visible sight and still provide an adequate reception.
